DuFresne has been my mechanic ever since I moved to the area 12 years ago. They keep my 15 year old Prius running fine. The mechanics really know what they're doing. The front office is professional and efficient. They value

their customers' business, and it shows.

I was in Portland on business, and my rig broke down. AAA got it to Du Fresnes overnight, and I called them at 6 AM to see what they could do. They got it diagnosed and fixed on the same day so that I could make it home on schedule! Thank you! It made a stressful event much easier to handle!

No math is required to solve a Sudoku. You only need logic and patience. Simply make sure that each 3x3 square region has only one instance of the numbers 1-9. Similarly, each number can only appear once in a column or row in the larger grid. The difficulty on this puzzle is easy.

dog days
of summer
are here!

july 3 to
August 11

It's hot. It's humid. The Dog Days are here. The term Dog Days dates back to ancient times, when people studied the sky and relied on the heavens and the stars for navigation and spiritual sustenance. These ancients looked into the night sky, before modern lights obscured the stars, and imagined that the constellations formed images of bears (Ursa Major and Ursa Minor), a bull (Taurus) and dogs (Canis Major and Canis Minor). Sirius, called the dog star, was the brightest star in the night sky. It was so bright that the Romans thought it added heat to the earth. In late summer, Sirius rises and sets with the sun, furthering the notion that the heat of the combined stars created the muggy, sultry weather. They called the 20-day alignment of the sun and Sirius the Dog Days. This alignment can vary in exact dates with the latitude of the observer and by the annual variances in the equinoxes. Most of us know only that this period is too hot for a good disposition and look for ways to stay cool during those 20 days. We could go for a swim, take a vacation to a cooler climate, go to an air-conditioned theater or spend a few leisurely hours shopping at the air conditioned mall. Dress in cool clothes and don't over-exert. But if you are still uncomfortable, you can blame it on the big dog and that familiar old star, the sun.

Demographics of social media sites explained

Who uses what social media? You might want to know if you are selling a product, or even just blogging. Facebook. Statista reports that there are nearly 3 billion active Facebook users, including roughly 180 million in the United States. Essentially every demographic, whether we're talking age, income or whatever else, is present. Many big brands have found building relationships on Facebook more effective than directly pushing products. But the number of teenage users has declined by 13 percent since 2019 and is projected to shrink another 45 percent the next few years. If you want to engage with teens, it's best to look elsewhere. LinkedIn. A business-focused platform with over 800 million users. Fifty-seven percent of users are male, while 43 percent are female. Age-wise, folks aged 18-24 account for only about 10 percent of users, while those aged 25-34 make up around 30 percent. Less than 2 percent are 55 years or older. TikTok. Over a billion users, according to Sprout Social, with roughly half falling between the ages of 10 and 29. Instagram. A billion-plus members with 60 percent between 18 and 34.
